Statement of Need / Program Overview

This symposium is intended to improve care of patients with hematological malignancies by accelerating adoption of new guidelines and evidence-based practice change. The format will include didactic lectures from known opinion leaders, question and answer sessions, and ample opportunity for participant interaction with faculty.

Target Audience

This symposium is directed primarily to hematologists/oncologists, radiation oncologists, researchers, pharmacists, registered nurses, physician assistants, nurse practitioners and fellows in training interested in new development in hematological malignancies. No specific skill or knowledge other than a basic training in hematology/oncology is required for successful participation in this activity.

Learning Objectives

After completing this activity, the participant should be better able to:

- Explain the treatment options for diffuse large B-cell lymphoma (DLBCL)
- Explain the treatment options for follicular lymphoma (FL)
- Evaluate the treatment options for chronic lymphocytic lymphoma (CLL)
- Evaluate the treatment options for mantle cell lymphoma (MCL)
- Cite the novel treatment options for peripheral T-cell lymphomas (PTCL)
- Describe the role of risk stratification and upfront therapies in multiple myeloma
- Appraise novel approaches in the treatment of relapsed and refractory multiple myeloma
- Describe the role of maintenance therapy in the management of multiple myeloma
- Describe emerging novel therapeutic pathways for multiple myeloma
- Identify updates in the treatment of chronic myelogenous leukemia (CML)
- Select appropriate treatment options for myelodysplastic syndromes (MDS)
